

Our "Non-Traditional Financials" portfolio is a concentrated portfolio of FinTech companies, employing a bottoms up, fundamental research approach. Instead of investing in traditional financial companies, like banks or Insurance companies, Manole Capital avoids opaque balance sheets and credit sensitivity. We prefer to own transparent, transaction-based business models, generating predictable free cash flow. This portfolio has significant exposure to financials with strong secular growth opportunities, recurring revenues and sustainably high operating margins.

Our definition of Fintech is "any company that utilizes technology to improve or alter an established process."
